

I understand that you are considering prioritizing LPFM service over existing FM translator service. This could cause problems for our KLOVE station (FM 106.7). The K-Love station is very important to me, as it plays music 24 hours per day that is very soothing, reducing stress. There is no alternative to KLOVE in our area, so shutting this down would have a very negative effect on me. At least 4 of my freinds also listen to the station, with substantial and long-term positive benifit. I believe it is in the public interest to continue these broadcasts because they provide an enjoyable yet morally stabalizing alternative to other music which promotes values which, in all likelihood, do not help our society function in a reasonable manner.

Thank you for your consideration.

Bill Parker
